 Owner's Veterinary Practice (optional):
PREVIOUS EXAMINATION: YES NO
 Date of Exam: / / 20
GENETIC SCREENING: Test Lab: / / 20
 Date of Exam: / / 20
 RESULTS (eye conditions only):
 Owner / Agent: / / 20

REGISTRATION DETAILS:
 Reg. Name: Kigarrin Hard Heated (Sookie)
 Country of Origin: Hannah
 Date of Birth: 1/9/10
 Reg. No.: 31001554
 Breed: Lowchen
 Sex: Male Female
 Colour: Silver
 Permanent Identification (Tattoo / Microchip): 95600002629731
 I hereby declare that the dog submitted for examination is the one described above and that all the given statements are true. I understand that the information obtained may be used for statistical or research purposes without disclosing the identity of individual dogs, and that this applies for both Open Register and Closed Register breeds. In any breed where the ANKC National Breed Council or breed clubs in all States have adopted an 'Open Register' policy in regard to inherited eye defects, I accept that the results for all dogs submitted for an ACES exam may be published.

EXAMINATION OF EYE AND ADNEXA

INSTRUMENTATION:
 Mydriatic
 Direct Ophthalmoscope
 Indirect Ophthalmoscope
 Slit Lamp Biomicroscopy
 Gonioscopy
 Other: _____

PARTS EXAMINED:
 Adnexa
 Cornea
 Iris
 Lens
 Vitreous
 Fundus
 UNAFFECTED AFFECTED

RIGHT **LEFT**

DESCRIPTIVE COMMENTS:
 NORMAL
 3435

INHERITED EYE DISEASE STATUS

This section applies only to those breeds in which the named conditions are known to be inherited and which are listed under the Australian Canine Eye Scheme Schedule 1 on the date of examination. Results will be forwarded to the ANKC inherited diseases database and may be made public but only for OPEN REGISTER breeds.

CONGENITAL (present at birth)
 (CEA) Collie Eye Anomaly
 (MRD) Multifocal Retinal Dysplasia
 (TRD) Total Retinal Dysplasia
 (CHC) Congenital Hereditary Cataract
 (PHPV) Persistent Hyperplastic Primary Vitreous
 (PPM) Persistent Pupillary Membrane
 (G) Goniodysgenesis

NON-CONGENITAL (appears later in life)
 (GPR) Generalised Progressive Retinal Atrophy
 (RPED) Retinal Pigment Epithelial Dysplasia
 (HC) Hereditary cataract
 (PL) Primary Lens Luxation

The age of onset of non-congenital inherited eye disease varies in different breeds and between individual dogs. It is therefore important to follow any advice given at the time of this examination with regard to the necessity for and frequency of eye examinations as set out in the 'Information for Owners' document available from AVA at www.ava.com.au/aces. "Affected" signifies that there is visible evidence of the inherited disease(s) specified, whereas "Unaffected" signifies that there is no such evidence.

I have examined the above animal (and confirmed its identity) under the Rules of the AVA-ANKC Australian Canine Eye Scheme, with results as shown. Interpretations of eye signs as reported in this form are those of the individual panelist and do not necessarily reflect the opinion of all registered specialists.

Signed: *R. S. M. L. G.* ACES Panelist
 Name (Block Letters): R. S. M. L. G.
 Date: 14 / 1 / 20 15

DISTRIBUTION OF FORMS: WHITE - OWNER (OPTIONAL COPY TO OWNER'S VET), YELLOW - AVA, BLUE - ACES PANELLIST).
